WORK EXPERIENCE

The Dunham Group

Jan. 2021 – Present

Web Developer

Hamilton, ON

- Translated complex PSD and Sketch designs into responsive, accessible websites
- Used Docker and Buddy to set up developer CI/CD tooling and pipelines
- Optimized our Webpack configurations to ensure small bundle sizes, resulting in a 100% loading time decrease on our homepage
- Managed Linux servers and cloud infrastructure. e.g. updated Apache and Nginx configurations and created proxies to serve our websites

The Keg Steakhouse & Bar

Nov. 2018 – Jan. 2021

Barback

Hamilton, ON

- Ensuring the bar is fully stocked and assisting guests at peak hours
- Thoroughly cleaning and organizing work stations at the end of the night
- Responsible for efficiently clearing and setting tables as well as polishing cutlery

SKILLS

Languages: HTML/CSS, SASS, JavaScript, Python, PHP, SQL, TypeScript, NodeJS

Technologies & Tools: Linux, Docker, AWS, React, Bootstrap, Tailwind, Prisma, Git, Webpack, MySQL, WordPress, NextJS, Apache, Nginx

CERTIFICATIONS

AWS Certified Developer - Associate

August 2021

PROJECTS

Binge Fest

This project was built using React and SASS and connects three third-party APIs and a corresponding real-time database in Firebase. It was built in a one-week time frame with three other team members, fully remote.

- Created a map component using the Google Maps API and completed functionality for it using the Yelp API, allowing users to find nearby restaurants
- Implemented the logic for the final result based on the TV shows currently saved in our NoSQL Firebase DB and the restaurants near the user's selected location

Solar Stay

This project was built using HTML, SASS, jQuery, and JavaScript.

- Designed and implemented a custom slider for selecting planets
- Used JavaScript to convert user input into results
- The site is fully responsive from small to large screen sizes
